# Mission, Vision & Promise

We want to reach and **inspire people** around the world looking to experience the pleasure of cooking with ovens and **share the taste of life** with their loved ones.

We want to provide professionals and amateurs with **beautiful high-performance ovens proudly Made in Italy with a commitment to quality**, for the best experience and satisfaction.

**Art and performance without any compromise!**

## 01

DESIGN &amp; PERFORMANCE

# Alfa cooks toppings at one temp, crust at another

## Why is it so difficult to make great pizza at home?

Pizza is the world's, and America's, favorite food. Ahead of burgers, steak, chicken. Everything!

Why, then, do people routinely make burgers, steak, and chicken at home, but not pizza?

The problem is the pizza. **The solution is Alfa.**

Burgers, steak, and chicken are easy to cook correctly. They are one-dimensional foods. Pizza is a two-dimensional food. You've got the dough, which needs to be cooked quickly on a stone at a high temperature. And, you've got the toppings - cheese, sauce, meats and veggies all of which have high moisture content. In order to fully cook them in the same short time it takes to bake the crust, you need an even higher temperature.

Other at-home pizza ovens, especially inexpensive entry-level pizza ovens, are not designed to make this all happen in concert. None of them, that is, except the Alfa Heat Genius™ Pizza Oven.

Alfa has a long history of building commercial pizza ovens, and they've applied this Heat Genius technology to their at-home pizza ovens. Alfa works like the commercial pizza ovens in a restaurant. It gets really hot and maintains the heat far better than other at-home pizza ovens. This means you get a crispy crust that's still moist and chewy, cheese that's melted and toppings that are perfectly cooked.

DESIGN &amp; PERFORMANCE

# Introducing Heat Genius™

Alfa's technology trifecta!

01

## Authentic HeatKeeper™ Firebrick

vs ordinary lava stone or ceramic

Alfa uses an authentic firebrick in every pizza oven they make. This HeatKeeper firebrick, which they make in their factory in Rome, Italy, the home of pizza, absorbs and stores heat far better than the lava stone or ceramic used in other pizza ovens. This is crucial to baking a crispy, moist crust at precisely the right temperature, quickly and without burning.

02

## DoubleDown Ceramic Superwool® Insulation

vs ordinary rock wool insulation (or no insulation at all)

The space between the two stainless steel walls on an Alfa Pizza Oven is filled with DoubleDown Superwool® insulation. This European ceramic fiber offers up to twice the heat resistance of the rock wool insulation used in other artisan at-home pizza ovens, which maintains the heat and allows you to consistently bake perfect pizzas. It also allows for faster heat recovery between pizzas and dramatically lowers the temperature of the outer oven wall.

Superwool® is a registered trademark of Morgan Advanced Materials

03

## Patented Full Effect Full Circulation Flue System®

vs ordinary "up and out" chimneys

Other pizza ovens exhaust precious heat out the chimney at the top of their oven. Up and out! Not Alfa. The chimney may be at the top, but, thanks to the patented Full Effect Full Circulation Flue System®, hot air circulates fully around the chamber and is driven back down to where it can heat the firebrick and pizza. This is key, as it ensures the proper temperatures required to bake both crust and toppings. The circulating heat then hits a deflector at the top of the oven and travels up an escape where it finally exits out the chimney. Around and down. Then up and out. Clever!

DESIGN E PERFORMANCE

# The art and science of **Pizza baking performance**

Alfa Forni's research and development department patented its **Flue System™ technology** in 2019. A **smoke extraction system that improves the circulation of hot air inside the cooking chamber**, increasing the oven's thermal efficiency.

This patented design helps Alfa Forni use all the heat available, while others lose it. Another reason why **Alfa lets you enjoy your pizza at home just like you would in a pizzeria**.

## Choosing the right size Alfa Pizza Oven

### Compact (1 Pizza)

A compact oven has ample space for a good-sized pizza. A full meal would need to be cooked in sequence.

### Medium (2 to 3 Pizzas)

A medium size oven has extra space allowing you to cook an additional item simultaneously cutting total cooking time in half.

### Large (4 to 5 Pizzas)

A larger oven has the space to cook pizza and an entire meal all at the same time, making ideal for a family.

## DESIGN E PERFORMANCE

## Six additional reasons to buy an Alfa Heat Genius™ Pizza Oven.

01

These ovens are built sturdy!

### Forninox™ Premium Stainless Steel Chamber Construction

If you are going to generate high heat you need to withstand high temperatures. The Forninox combustion chamber on an Alfa Pizza Oven is constructed of two different types of special thermal-resistant heavy-gauge steel.

The inner wall is made of a titanium-impregnated 441 stainless that can tolerate thermal stress, is resistant to heat, corrosion and atmospheric agents.

The stainless used for the exterior wall is also heat and acid-resistant as it contains less iron than the steel used in other pizza ovens.

Together, these chamber walls help retain Alfa's heat while also providing for a well-made, very sturdy oven.

03

The finish is beautiful and made to last.

### Double Powder-Coated Oven Shell

All Alfa Pizza Ovens are double powder-coated using a seven-step powder-coating process that will ensure a durable, long-lasting finish.

04

Our burners push heat across the oven while others blow it out.

### Premium SideFire Gas Burner

All gas-powered Alfa Ovens feature a SideFire Burner system in which the burner is located on the side of the oven. This way, the heat is blown across the oven to circulate up and around the combustion chamber. Other brands place their burners in the back of the oven. This means the heat is blown out the door which is, obviously, very inefficient.

05

Heats up much faster than other artisan pizza oven. (shorter time between pizzas, too)

### “Ready Already” Faster To Baking Temperature

Alfa's Heat Genius™ design not only allows you to bake the perfect pizza, it also allows you to start baking the perfect pizza much sooner. There is nothing more frustrating than having to wait for the pizza oven to heat up when you have hungry pizza-lovers that are ready to eat. Alfa can be ready in as little as 20 minutes, much faster than other artisan pizza ovens!

And, as important, your Alfa Pizza Oven will better-maintain the heat, as well. With other pizza ovens, after removing a baked pizza or pizzas, the vessel will take considerably longer to come back up to proper temperature which, again, causes hungry pizza-lovers to wait.

06

Seamless Shell. (unlike other pizza ovens)

### Seamless Shell Construction

Alfa Pizza Ovens are built to last. The oven shell features seamless construction which will last much longer than the riveted shells on other pizza ovens.

02

Testing reveals the perfect shape for the perfect pizza.

### OptiDome Half-Sphere Design

The unique shape of an Alfa Heat Genius Pizza Oven is integral to its performance. The “flattened” half-dome design was developed after extensive testing revealed the shape maximized circulation and heat flow, a phenomenon that leads to quick heat-up as well as consistent temperatures for even cooking.

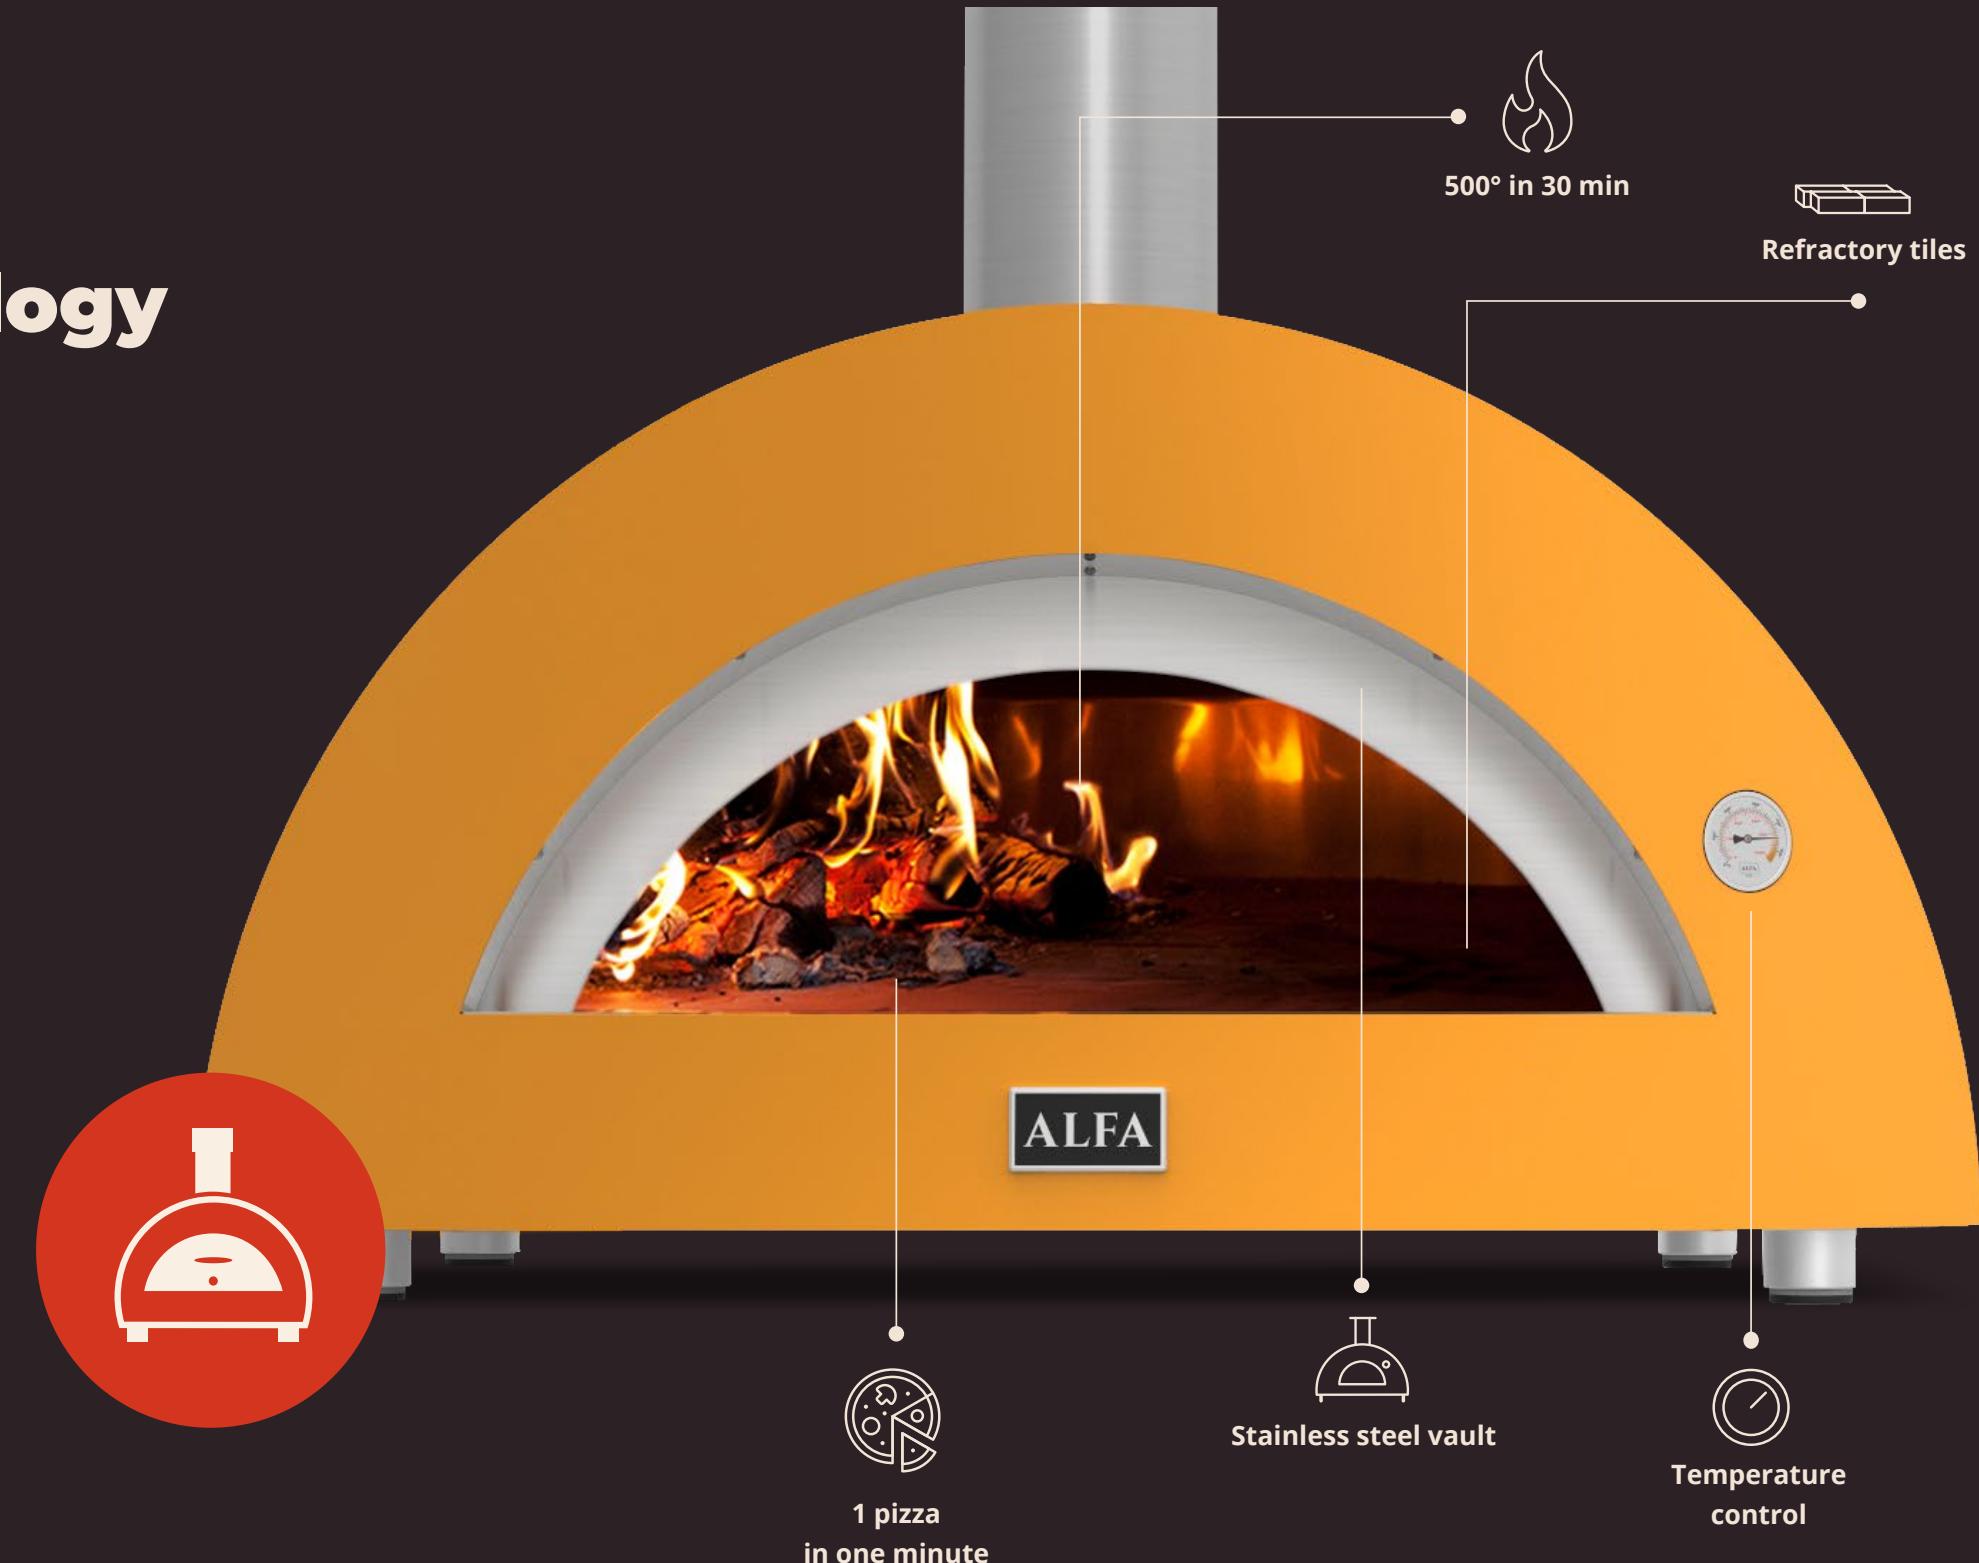

## DESIGN &amp; PERFORMANCE

# The perfect combination: **Forninox technology**

The innovation of Forninox™ technology consists in **combining the excellent physical and thermal properties of steel with those of refractory brick**, the material used to build professional ovens.

The **steel structure** ensures adequate resistance to the thermal and mechanical stress caused by the high temperatures reached by the oven.

**Insulating the dome** with two layers of ceramic fibre instead allows the temperature to be raised very quickly and held for longer, gradually releasing the heat and achieving optimal cooking.

**Italian quality  
and technological  
evolution** in a  
single oven!

# 02

MADE IN ITALY

## Handmade in Italy.

Alfa headquarter is based in **Anagni**, between Roma and Napoli, in the birthplace of pizza.

**Every Alfa Oven is 100% handmade in Italy, by skilled artisans.**

The word "artisan" comes from "art". That's why today more than ever, being an artisan means **combining creativity and skill, energy and passion to create something unique** with your own hands.

Our domestic and professional ovens have been recognized worldwide for their quality and design for more than 45 years.

Every Alfa Oven is  
**100% handmade  
in Italy, by skilled  
artisans.**

MADE IN ITALY

## A family business since 1977

Leading a professional team requires leaders who can lead and motivate, who have a clear vision of the future and a keen eye on traditions: **Marcello Ortuso and Rocco Lauro are the founders of Alfa Forni** and the soul of this great, wonderful company.

MADE IN ITALY

## Oven Pioneering

"We imagine a world where the wood fired oven becomes an intuitive device for everybody. We'd like to bring people back to their roots and see one of our flame ovens in every home."

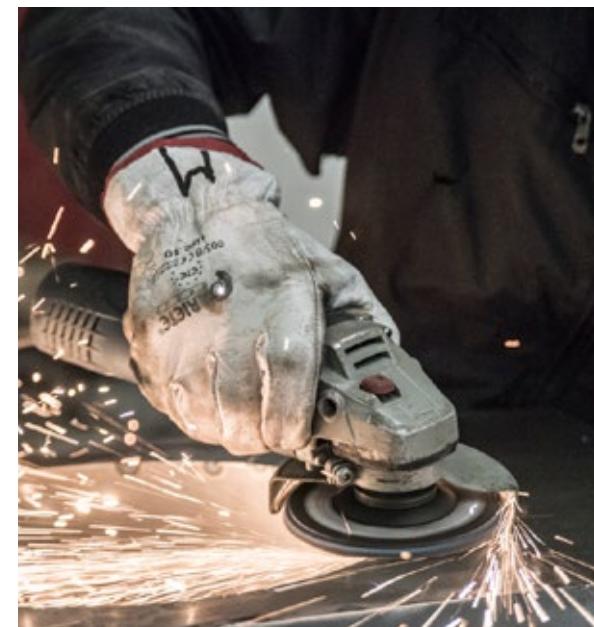

MADE IN ITALY

## Our guiding principles

### 01.

#### QUEST FOR VALUE FOR CUSTOMERS

We strive to anticipate, understand and meet the needs and expectations of our customers through continuous dialogue, providing highly useful products.

### 04.

#### VALUING PEOPLE

As a family company, we are dedicated to the well-being of our employees and their personal development. We promote respect in mutual relations and believe in the value of lasting relationships with customers, suppliers and other industry partners.

### 05.

#### RESPONSIBILITY AND INTEGRITY

The utmost attention is dedicated to workplace safety and to fairness and integrity in conduct amongst ourselves, our business partners and the general public.

### 06.

#### LONG-TERM ORIENTATION

44 years after its foundation, the generational changeover with the inclusion of the second generation in top positions guarantees continuity and long-term orientation. Our harmonious and resilient strategic development are based on prudence and financial soundness.

# 03

ALFA FORNI

In the  
beginning it  
was the oven.  
**Now there's  
Alfa.**

The **pioneering** nature of our roots, the resilience we have built up in the face of change and our internationality have guided us on our journey of **growth**.

**Alfa Ovens are designed and conceived as professional ovens.** With their unique and patented design, our ovens **guarantee excellent cooking performance** thanks to innovative materials and technologies.

ALFA FORNI

# Family DESIGN

To define who we are, we like to start from an **absolute principle**, which for us is quality given by constant innovation, the selection of exclusively Italian materials and **attention to detail**.

Alfa ovens for domestic use are **uniquely designed products, suitable for classic and modern environments**, for gardens and terraces.

**MODERNO** Line

**CLASSICO** Line

**FUTURO** Line

ALFA FORNI

## MODERNO Line

The MODERNO Line was designed to enhance the beauty of the design and performance of Alfa ovens while maintaining the characteristic lines that distinguish them. Perfect for those who have many friends with whom to share the taste of Italian cuisine.

Alfa ovens are the most satisfying **outdoor cooking experience**.

Every technical feature of Alfa's stainless ovens is designed to improve your life.

Starting with the speed of ignition and cooking precision: they quickly heat up to 500°C and can cook a pizza in 1 minute.

“The new **Portable**  
**Pizza Oven** by Alfa“

MODERNO Line

## Portable

A true Neapolitan Pizza Oven, that marries technology and design in only 35 Kg.

The new Moderno Portable is compact and lightweight (Only 35 Kg) and thanks to the available carry bag cover can be transported anywhere you desire. Easy to assemble - just insert the flue and chimeny cowl and let the party begin.

Dimensions: 55 x 53 x 91h cm

ACCESSORIES AND COMPLEMENTS

## The **tools** of the trade.

To get the most out of your wood-fired oven, Alfa Forni has put together a complete catalogue of accessories to make preparing and cooking food easier, letting you serve dishes full of flavour and tradition.

Alfa accessories will ensure that you **always have the right tools at the right time**. All the tools in the Kits are certified for food use and selected according to the highest quality standards.

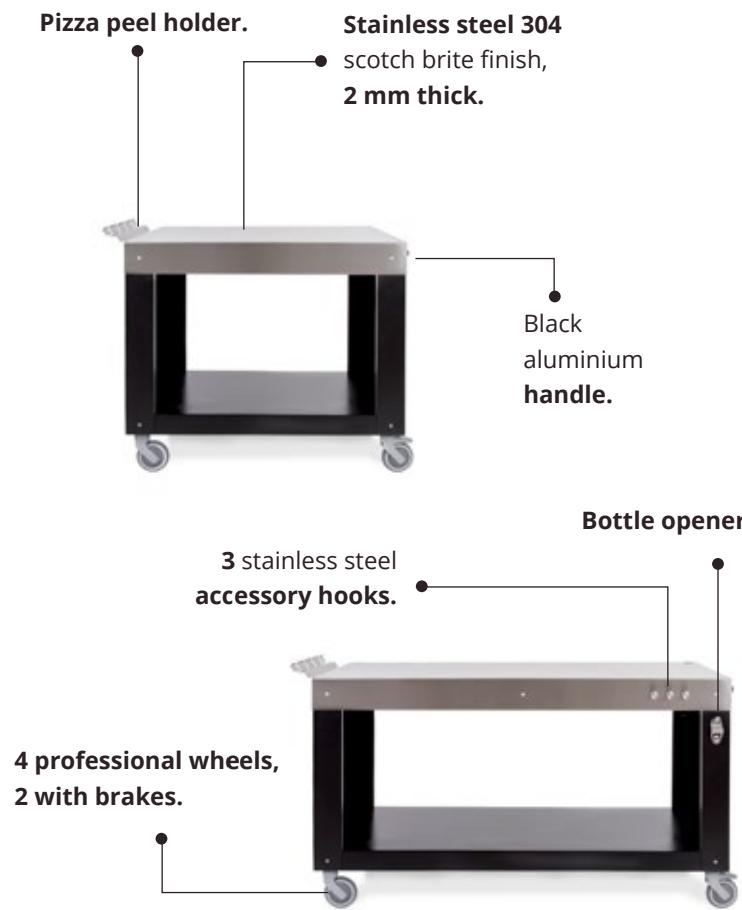

## ACCESSORIES &amp; COMPLEMENTS

# Multi-functional base

Multi-functional pizza base that serves as a **station for preparing pizzas** and as a **base** for ALFA top ovens.

Available in the following versions: 100 cm - 130 cm - 160 cm.

\*The 130 and 160 cm models include a cylinder cover bulkhead and two umbrella holes.

## Details

Protect your oven  
with **Alfa Covers!**

ACCESSORIES &amp; COMPLEMENTS

# Kit Pizzaiolo

The Kit Pizzaiolo includes **all the tools you need to prepare and roll out pizza dough, bake and serve it.**

## 1 RAKE PEEL

The **ember rake** lets you manage the cooking floor. Use it to move ash, embers and wood safely.

## 4 PIZZA PEEL

Peel for putting uncooked pizza in the oven, with holes to allow excess flour to fall out.

## 7 OVEN MITT

**Heat resistant glove** in continuous-filament, 100% cotton bouclé yarn.

## 10 ALFA APRON

With the ALFA apron, everyone will know that **you're the chef.**

## 2 TURNER PEEL

The **turner peel** is used to turn pizzas while they are cooking.

## 5 WOODEN CUTTING BOARD

The **wooden cutting board made of food-grade spruce** allows you to follow the grooves to cut pizzas into equal parts.

## 8 BREAD SPATULAS

**Asymmetrical peel** for easily gripping bread.

## 11 COOKBOOK

Lots of **recipes for your wood-burning oven.** Developed by the chefs of the Alfa team.

## 3 BRUSH PEEL

The **brush peel** has brass bristles that make cleaning the refractory surface more effective without scratching it.

## 6 LASER THERMOMETER

The **infrared thermometer** makes it easy to read the temperature at every point of the cooking surface

## 9 PIZZA CUTTER

Pizza cutting wheel with an ergonomic handle and removable steel blade.

## 12 PIZZA DOUGH BOX

The box ensures the proper air conditions for the **dough rising process.**

## ACCESSORIES &amp; COMPLEMENTS

## Professional **peel set**

The new pizza peels **designed by Alfa** are the result of more than a year's research by the R&D team: **all the peels can be unscrewed and screwed** together if necessary using universal extensions, starting from 95 cm up to the desired length.

## Details

**RAKE PEEL**

**Ember rake:** made of stainless steel, it lets you safely move ash, embers and burning wood.

**TURNER PEEL**

**Turner peel:** light, robust and handy, it is used to turn pizzas while they cook.

**BRUSH PEEL**

**Brush peel:** brass bristles that make cleaning the refractory surface more effective without scratching it.

**PERFORATED PEEL**

**Peel for putting uncooked pizza in the oven,** with holes to allow excess flour to fall out.

**HANDLES AND EXTENSIONS**

Anodised aluminium tubular handles and duroplast grips.

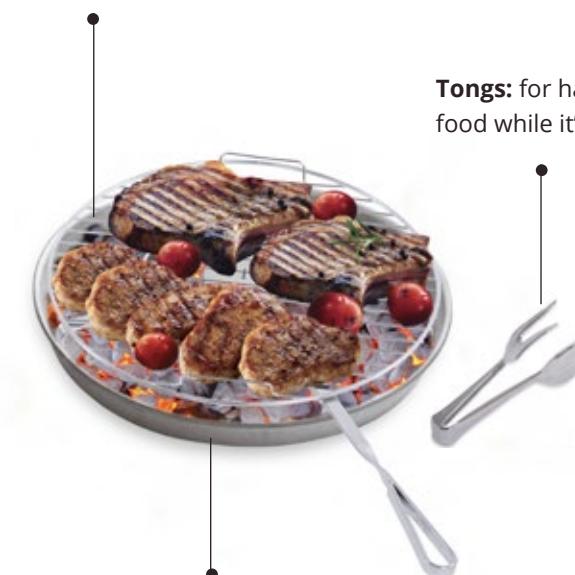

## Vela **peel holder**

In addition to being convenient and functional, the Vela peel holder is an accessory with a refined and innovative shape that perfectly adapts to the interior and exterior of your home.

**Rotating grill:** allows you to adjust the cooking time, moving food with a simple gesture.

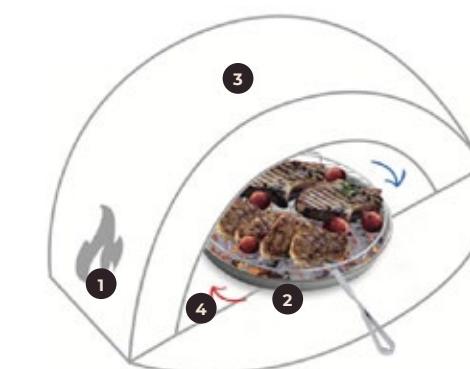

**Tongs:** for handling food while it's cooking.

**Tray:** sized to the grill to protect the cooking surface, ideal for melting excess fat during cooking.

## Details

## 4 heat sources!

- 1 Open flame
- 2 Hot embers
- 3 Enveloping dome
- 4 Hot brick

### ACCESSORIES & COMPLEMENTS

# BBQ 500

**With "BBQ 500", your Alfa oven becomes a barbecue** with the power and control to cook with a flame and embers, up to 500°C, in both gas and wood-fired ovens.

Available in the following versions: 30 cm - 37 cm.

## ACCESSORIES &amp; COMPLEMENTS

# Kit Hybrid

The Alfa Forni patented kit makes it possible to **use your gas oven with wood**: cover the burner on the left with the special burner lid to protect it from soot and the heat of the flame, and use the wood guard on the right to keep the wood on the side.

**WOOD HOLDER:**

It contains the firebox, passing the proper amount of air for combustion and keeps the cooking surface clean.

**BURNER LID**

A special lid for the gas burner, which prevents damaging the gas supply system when using the oven with wood.

# Details

## Alfa **Wood holder**

The advantages of using the Alfa wood holder are:

- Quick and easy flame ignition thanks to the increased passage of air under the wood.
- Easy cleaning during use of the wood-burning oven
- Functional and elegant design, with perforated Alfa logo.
- Made of high-quality steel.
- Available in 37 or 59 cm versions.
